In trying to construct a burlesque en the romances of adventure in The Oruise of the Jasper B. His here is a copyreader for a daily newspaper, who has been obliged to suppress his craving for romance. He mes suddenly rich, when his first act, we regret to say, is to tell the night editor, whom he dislikes, just what he thinks of him. Then he starts after romance; he buys a dereliet craft moored in a Long Island creek, which he proceeds to refit. Indiana of Glacier Park.

The ethnographic ardor that led James Willard Schultz to identify himself with the Blackfeet Indians makes him an unusually competent authority to relate their legends. In Blackfeet Tales of Glacier National Park (Houghton Mifflin Company) he connects by a thread of narrative of experiences of his own and of others among these Indians the tales they tell, their traditions and their former customs. He deplores justly the substitution of commonplace names for those given by the Indians to the mountain peaks and other places. The book is illustrated with many fine photographs. Apart from its value as an ethnographical record it will be indispensable to visitors to the park, for it gives life and romance to the magnificent scenery spread before them.

Mrs, Rinchart's Ride.

It is convenient to join to Mr. Schultz's book the enthusiastic description of her horseback excursion Through the Glacier Park, written by Mrs. Mary Roberts Rinehart (Houghton Mifflin Company), which has more the character of a guide book. She formed part of a personally conducted cavalcade of forty-two persons which travelled 300 miles on horseback, and she tells of her enjoyment of every moment of the trip. It is a very personal account, which will make the reader share the author's enthusiasm. little book is illustrated.
